

Amazon Fire TV

Develop for the leading streaming devices with over 250 million Fire TV devices worldwide.

Devices

Fire OS

Vega OS

Why develop for Fire TV

Seamless app discovery

Fire TV's Cinematic UI showcases key app content on the home screen. Features like Catalog Integration and the Alexa Video Skills Kit improve discoverability.

Create meaningful connections with customers

Expand your reach and drive engagement within your app with features like Live TV, Login with Amazon, and the Fire OS recommendation engine.

Publish and build your app with ease

Our operating system, Fire OS 16, is based on Android 9 (Pie) and API level 28, making it compatible with existing Android apps, without additional engineering effort.

Our devices

Fire TV Stick 4K Select

Fire TV Stick 4K Select is our most affordable 4K streaming stick yet—designed for people who want great entertainment without the premium price tag. Fire TV Stick 4K Select has the full Fire TV experience—including access to over 1.8M movies and shows from all the major content providers, 2,000 photos through the Ambient Experience, and easy access to Alexa.

Introducing Vega OS

Built for streaming players like the Fire TV Stick 4K Select, Vega OS allows for fast app launches and smooth interfaces without sacrificing the Fire TV experience customers know and love. Starting with Fire TV Stick 4K Select, all future Fire TV Sticks will run on Vega.
