Stakeholder event on guidelines on the interplay between data protection and competition law: overview of topics available

 30 July 2026

We use cookies

When you visit our website, if you give your consent, we will use cookies to allow us to collect data for aggregated statistics to improve our services and remember your choice for future visits.

If you don't want this, we will only use cookies to remember your choice for future visits (i.e., essential cookies).

If you don't select any of the two options, no cookies will be deployed, but the banner will re-appear every time you enter our website.

Right to privacy in a digital world

In our digital age, where information is constantly shared, collected and processed, clear and strong data protection rules are needed. They ensure that individuals stay in control of their data, and safeguard their personal freedom, autonomy and freedom of expression. Data protection rules are also crucial to prevent misuse, unauthorised access, identity theft and manipulation. Strong data protection safeguards build trust in online services.
